CUSTOMERS ARE THE HEART OF OUR ORGANISATION

PLUSpak Pty Ltd was established in 1981 and has grown from humble beginnings – from the back of owner Alfred Gauci’s parent’s home – to become one of the most respected Australian owned and family operated consumables suppliers. We’ve been around for 40+ years and pride ourselves on providing the best quality, the best price and most importantly, the best customer experience.

By staying true to our values, PLUSpak has steadily grown and diversified into:

- Retail packaging
- Cleaning supplies
- Quick Service Restaurants
- Safety
- Medical
- Food manufacturing sectors

PLUSpak has long term relationships with the finest manufacturers in South East Asia, where we source many of our products that feature the well- recognised “Pak” logo. In order to strengthen our low-cost sourcing capability and to also tap into constant innovation, Pluspak set up sourcing offices in Malaysia, China and Hong Kong.

Our regional positioning provides our customers with unprecedented access to a limitless supply of custom packaging supplies, so if there’s a certain product that you have in mind, our team are in the best possible position to source it for you!

WHY CHOOSE PLUSPAK?

WE'RE BETTER.

PLUSpak is a family owned business with more than 40 years' experience in custom packaging supplies. Based in Melbourne, Australia, PLUSpak is 100% Australian owned and operated and has steadily grown to become one of the largest and most innovative Australian packaging suppliers in the marketplace.

OUR CATEGORIES.

Our "Pak" logo is synonymous with quality and custom products, hence why you may have already seen it in some of Australia's most recognised retail and food and beverage brands sites. We are a high volume supplier of consumables in categories in Retail, QSR, Food manufacturing and Safety, but also custom manufacture retail, commercial cleaning supplies and industrial packaging materials.

TAILORED SOLUTIONS FOR OUR PARTNERS.

We offer custom branded packaging options for a wide range of Australian and New Zealand corporate retailers and food and beverage companies.

At PLUSpak, we make a point of going the extra distance for our customers to source competitively priced, commercial and retail packaging supplies that make a lasting impact. After all invest in smart packaging and pay off with your customers, so its best to leave your premium packaging solutions up to our team of experts.

308CWBD-XL	Poly Cotton, PVC-Dot Grip	X-Large	240 pairs

WHAT ARE THE GLOVES MADE FROM?

NATURAL RUBBER LATEX

Natural Rubber Latex: Is a natural material (from the Hevea tree) that resists several chemicals such as acids, bases, alcohol and diluted aqueous solutions. This product offers fair protection against undiluted ketones and aldehydes. The inherent physical properties of 'Natural Rubber Latex' are resistant to punctures while remaining extremely flexible.

SYNTHETIC RUBBER COMPOUNDS

Nitrile: Offers good protection against basis, oils, many solvents and esters, grease and animal fats. 'Nitrile' is recommended for ketones and some organic solvents. Excellent resistance to cuts, abrasions, snags and punctures.

Neoprene: (Polychloroprene) is resistant to a broad range of oils, acids, caustics and solvents but is less resistant to cuts, abrasions, snags and punctures than 'Nitrile' or 'Natural Rubber'.

Polyvinyl Chloride (PVC): Good protection against many acids, caustics, bases, and alcohols. Not recommended for ketones and some organic solvents. Excellent abrasions and cut resistance, but some styles are susceptible to cuts.

Polyethylene (PE): Economical protection for chemicals, oils, fats, punctures and abrasions. Component materials comply with FDA regulations for food contact.

Polyester/Cotton Blends: (Poly/Cotton) is used in various combinations as a yarn from which protective products can be woven or knitted. In shredded form, 'Poly/Cotton' is often used as a flock lining material in some types of unsupported gloves. In the form of felt and similar materials, it may be used as an insulating liner inside some types of supported gloves.

Is the Powder on Powdered Gloves a hazard to health?

No. The powder on Disposable Gloves is made from medical grade corn-starch which does not present a hazard to the user. The reason for concern over powder is that when used on Natural Rubber Gloves, it can act as a carrier for Latex Protein. If powder is a major concern for your company, then Powder-Free Disposable Gloves are available.

What is the difference between Natural Rubber & Synthetic Rubber?

'Natural Rubber,' as the name suggests is a natural material obtained from the rubber tree, 'Hevea Brasiliensis,' whereas 'Synthetic Rubber' is made from petroleum-based products. There are many types of 'Synthetic Rubber'; those most commonly used are:

- 'Nitrile Rubber (Acrylonitrile-Butadiene),' 'Polychloroprene often referred to as Neoprene,'
- 'Plasticised PVC' often referred to as 'Vinyl' is included into the list of Synthetic Rubbers.

Each 'Synthetic Rubber' has distinct chemicals and physical properties. Although, 'Natural Rubber' still retains its reputation for strength and comfort.

WIPES
