

SUSTAINABLE PRODUCT RANGE

WITH OVER 40
YEARS OF FOOD
PACKAGING
EXPERIENCE,
PLUSPAK IS COMMITTED TO
PROVIDING YOU WITH EXPERT
ADVICE AND CUSTOMER
SERVICE TO SUIT YOUR
BUSINESS NEEDS.

We cater to customers across all areas of the food industry who require disposable food packaging supplies, from distributors to national retail and food service giants and market leaders. Here at Pluspak our job is to provide sustainable and affordable packaging so we can change Australia and New Zealand.

The world is a changing place and we at Pluspak want to do our part. We have intensely assessed the market and have sourced the highest quality, lowest cost food packaging alternatives to delight our customers. We are excited to launch a growing range of innovative products to our existing and new customers. It's us doing our part to provide

sustainable choices to our customers that can improve our planet.

Our new Pluspak range presents viable compostable and sustainable alternatives to various existing high usage product lines. The pricing of sustainable options has become more competitive in recent years, allowing companies to take an affordable stance on the environment and also show customers we are all taking steps in the right direction.

So, check out our comparison products below to see the alternative products and price comparison that will allow you to commence the journey to help our Planet.

SUPPORTING INFORMATION FOR OUR CUSTOMERS

As background, what is compostable?

When food packaging is compostable, it can be disposed together with food waste. After time it breaks down with the food, turning into composite which can in return help make more food. And the best part is, we can simply waste collections as no sorting is needed which will not contaminate our recyclable waste processes.

Our Compostable/ Degradable Products:

- Products made from sugarcane bagasse or bamboo fibres: plates, trays, cups and clamshells
- Wooden cutlery/ coffee straws
- Cardboard trays and boxes
- Paper Bags
- Paper cups with PLA lining or water-based cups
- Sugarcane coffee lids
- PLA clear cups and deli containers
- PLA cling film
- PLA pallet wrap
- PLA Corn-starch bin Liners
- PLA bag/produce rolls
- TPE/ PLA gloves
- Bamboo Pulp wipes

PLA bioplastics are produced from PLA (poly-lactic-acid) made from corn starch, which is a natural, annually renewable resource. The production of PLA produces much less greenhouse gas emissions compared to your normal plastic production. PLA products can be composted in commercial compost facilities.

Wood / Paper / FSC Certified -

The original raw material used for our wooden cutlery and paper cups manufacture is wood fibre, from sustainably managed forests, natural renewable resource.

Paper cups end of life options: Our paper cups are lined with PLA lining and are compostable in industrial composting facility only. Wooden cutlery end of life options: compostable.

Bamboo / Pulp / Paper - Fast growing bamboo regrows quickly, making it a great sustainable option. Bamboo is one of the fastest growing plants on earth. Bamboo requires no irrigation and unlike trees it rarely needs replanting after it harvested, it grows rapidly and can be harvested in 3 to 5 years.

Sugarcane bagasse / Pulp Sugarcane - Bagasse itself is a waste material. The dry fibrous residue left after sugarcane stalks have been crushed to extract the juice mainly for sugar manufacturing. When the fibres already crushed, less energy is required to make bagasse products compared with pulping wood for paper products.

Products made from sugarcane bagasse are strong and durable, natural fibre is very pleasant to touch and breathable. Leak and oil proof, with no lining required. Microwavable (warm up only). Refrigerator safe. ISO 9001. Compostable and recyclable (paper stream). Our products are made to decompose in a commercial composting facility within 60-90 days. Also, they are suitable for home composting.

Please refer to the below information for product specification details and let us know if you have any queries.

PLA BIN LINERS

Product Codes	Product Name	Size(mm)	Carton QTY
BINL-PLA-BLK-27	Bin Liner 27 Black HD Roll PLA	510*590*35um	500
